To whom it may concern:

The purpose of this letter is to confirm that CG Supervisiones, S.C. (formerly ACA Construcción y Supervisión, S.A. de C.V.) and its principals, Carlos Acevedo and Gustavo Hernández, performed the Quality Assurance Supervision for the fit-up of the new offices of the Canadian Consulate in Guadalajara, Jalisco, Mexico, during the 2006 to 2007 period.

I had the opportunity to interact with these two gentlemen in the final stages of the fit-up process and can confirm that throughout they both demonstrated significant technical knowledge, professionalism, dedication and customer orientation and service to the project and in all their interactions with my colleagues from the Department of Foreign Affairs and International Trade's (DFAIT) project management team, with the Consulate's team and myself, and with the local interlocutors involved in the construction and fit-up of the Consulate's new installations.

From the client's perspective, I believe that the work ACA Construcción y Supervisión (now CG Supervisiones, S.C.) did for the Canadian Government (DFAIT), substantially contributed to the overall positive results of this fit-up project in terms of timeliness, quality, cost and client satisfaction.

Should you need any additional information, please do not hesitate to contact me at the coordinates noted above.

Sincerely,

Kathryn Aleong
Consul & Senior Trade Commissioner
